About

I am a first-year Computer Science and Engineering student at KL University in Hyderabad, I am deeply passionate about building practical software solutions and exploring the ever-evolving world of technology. I am currently strengthening my core programming skills in Java and Python, while actively building my foundation in Data Structures, Design Thinking, and modern software development concepts. Beyond academics, I enjoy combining my technical curiosity with creative problem-solving and an enduring passion for art. I am eager to collaborate on innovative projects, expand my technical expertise, and connect with professionals and peers in the tech industry. Core Skills: Java, Python, Data Structures, Design Thinking, Problem Solving

About

I am a Computer Science Engineering student that is very passionate about tech and computers. I am improving myself by expanding and updating my knowledge of computer science and technology in order for me to continue to develop my technical expertise on software development and computer science.

I am interested in studying and getting hands-on experiences with new topics and concepts, and apply them or computer science and software development related activities and studies. I am really into computers, computer systems and new innovations revolving around it.

My objective is to learn new things, improve my knowledge and skills, and gain as much experience from my career path, while collaborating with other people.

I am looking forward to meeting and interacting with professionals, and learn from their areas of expertise while learning new things along the way and expand my knowledge in this vast world of technology and computer science.
